COMPANY PROFILE

“FEC’s primary concerns when working with surface and groundwater systems are safety and sustainability.”

For over twenty years, Ferber Engineering Company, Inc. (FEC) has been providing quality services to local, state and federal government entities, as well as private clients. Serving the western South Dakota region, FEC has grown to include two principal engineers and fifteen full-time employees. Offering comprehensive solutions for designing civil engineering infrastructure projects, conducting water resources and environmental studies, land surveying, developing geographic information systems, performing construction related services and carrying out planning studies, FEC’s highly skilled staff strive to provide innovative solutions specific to each client’s individual needs. FEC staff work hard to provide personalized service and take pride in making the region they live, work and play in safe and sustainable.
