

COMPANY PROFILE

“FEC maintains state-of-the-art surveying equipment including RTK GPS systems, robotic total stations and conventional instruments.”

Ferber Engineering Company, Inc. (FEC) was founded in 1991 as a full-service civil engineering consulting firm. For the last 25 years FEC has been providing quality services to local, state and federal government entities, along with a wide range of private clients. Serving the western South Dakota region, FEC has grown to include two principal engineers and sixteen full-time employees. Offering comprehensive solutions for designing civil engineering infrastructure projects, conducting water resources and environmental studies, surveying the land, developing geographic information systems, performing construction related services and carrying out planning studies, FEC's highly skilled staff strive to provide innovative solutions specific to each client's individual needs. FEC works hard to provide personalized service and takes pride in making the region they live, work and play in safe and sustainable.
